Jovy PC Suite Release Note

The Jovy PC Suite® is a simple yet very efficient software that allows the user to fully control the RE-Series stations and the TURBO-IR Bench-top through a few easy clicks.

Please make sure that you are always updated and that you are using the latest Software, Firmware and Driver versions of the Stations, by checking periodically and [DOWNLOADING](#), them for the best performance, stability and for your own comfort.

PC Suite v5.00

- Enable editing the safety temperature of the stations from Jovy PC Suite.
- Supports the new developed RE-8500 station with three thermo-couples.
- Modify stage message position on graph while monitoring a process on RE-8500, RE-7550 and Turbo-IR.
